next generation kitchen experience

The dynamics of the age we are living in are our guide. Demand,likes, trends. Our corporate culture is based on the know-how and experience we have accumulated throughout our history. All these values constitute the commitment we represent. Contemporary, far-from-obsolete, innovative products employing the latest technologies and improving quality of life.

silverlinedesignstrategy

simple+

our design approach

The kitchens in our living spaces have had different meanings throughout ages. Today, the kitchen is more than just a cooking area in our homes. New urban lifestyles, such as high technology, common area use and high efficiency, have changed the characteristics of kitchens, making them more integrated into our daily lives. Therefore, Silverline offers an approach that focuses on the changes in the meaning and characteristics of the kitchen while creating new design solutions.

Based on sectoral trends in our designs in the cooking appliances line, we looked for new ways that are meaningful and fascinating for the end user, that emphasize the strong stance of the brand in the built-in appliances industry, that are user-centered and are simplified for the user.

OVENS

The kind of multi-functionality that adds taste to your meals and makes expert cooks envious at the same time is now integrated with a multi-dimensional understanding of design.

SMART SUPPORT

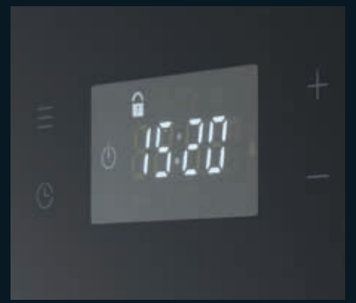
Easy and fast way to access after sales support. It enables quick access for after sales support in case of a problematic issue via mobile application.

3D AIR FLOW

It provides proper heat distribution for uniform cooking and convenient for cooking up to 3 trays.

AUTOMATIC PROGRAM

Thanks to the automatic cooking programs, the cooking choice is offered automatically according to the type of food.



CHILD SCREEN LOCK

No matter what key your child plays on the screen, the settings of your oven can't be changed.

LARGE CAVITY SIZE

It gives flexibility to prepare larger meals with its 72 liter net volume.

COOL DOOR

The reflective glass on the inside of the door significantly reduces the temperature of the outer part of the door at all ovens. So, it provides a safer environment when preparing the delicious meals in the oven.

SOFT CLOSE

It slows down the movement of the door and ensures your oven door closes gently.

SOFT OPEN CLOSE

It slows down the movement of the door and ensures your oven door opens and closes gently.

TELESCOBIC EXTENTION

Allows you to remove trays easily from the oven. This makes usage of trays more convenient and easy to use.

MEAT PROBE

It gives very accurate cooking results by measuring the internal temperature of the food.

Easy Cleaning:
It’s time for a little magic!

Cleaning the oven can be an easy scrub free task with just a little bit of work. Silverline makes the cleaning of the ovens much easier by offering various cleaning solutions. They prolongs the life of your oven and help you save time every day to make your life easier in your kitchen.

SELFCLEAN +

The quick and easy option for effortless cleaning thanks to catalytic panels. The back and side wall panels absorbs dirt that splashes from food.

SELFCLEAN

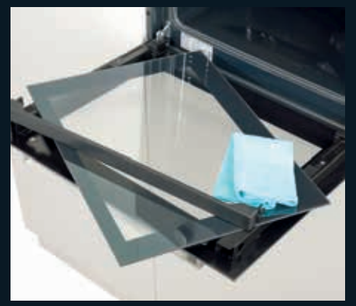
Above advantage is available only for back wall.

STEAM CLEAN

The heat turns water into steam and softens food residuals for easy cleaning.

PYROLYTIC CLEAN

It heats the inside of your oven to temperatures upwards of 480°C, turns food residual to ash.



EASY EXTRACT

It enables to remove easily the front glass panels of the oven.

EASY CLEANING

The easy cleaning for day to day maintenance.

ANTI – FINGER INOX

Anti-finger inox surface provides comfort in cleaning.

LEGENDS

OVENS

BOTTOM RESISTANT: To cook something which needs to crisp on the base but stay moist on the top. This function is best suited for foods which need more temperature at the base such as pastry and pizzas and it is great for gently cooking stews and casseroles.

TOP RESISTANT: Top resistant creates the perfect roasting or crisping effect. Helps with the browning of dishes such as those topped with cheese or potatoes, under a less fiery heat than grill.

TOP RESISTANT + BOTTOM RESISTANT: Cooks items which sit in the centre of the oven best. Use this conventional heating mode for roasting meat and vegetables or baking cakes.

TOP RESISTANT + BOTTOM RESISTANT+ FAN: Food is cooked evenly and quickly all around thanks to lower and upper resistants and the fan are simultaneously on. This mode is most suitable for delicate cooking such as cakes, pastries, biscuits.

TOP RESISTANT + GRILL: Food can be cooked extremely quickly using both the top resistant and the grill.

TOP RESISTANT + GRILL + FAN : Top resistant, grill and fan are activated simultaneously, so heat is spread throughout the oven and radiated over the grill's surface area. It is ideal for larger portions.

TOP RESISTANT + FAN + RING HEATER + BOTTOM RESISTANT : Top and bottom resistants, turbo fan and ring heater(located around the turbo fan) are activated simultaneously. It provides proper heat distribution for uniform cooking and convenient for cooking up to 3 trays.

RING HEATER + FAN : It is used for one or more levels cooking and frying. Ring heater and turbo fan are activated.

DEFROST : It ensures that the food defrosts in a couple of minutes without losing its nutritional value.

BOOSTER: The booster function is used for quick pre-heating to reach the desired cooking temperature. (it is not suitable for cooking food.)

GRILL: Grill resistant is used especially for food to be fried.

FAN + BOTTOM RESISTANT : For preparing pizza and dishes which require a lot of heat from underneath. The bottom heating element and the fan are activated.

GRILL + FAN: This indicates the simultaneous activation of the grill and the turbo fan and enables the cooking of small portions of white and red meat, sausage, etc.

GRILL + FAN + BOTTOM RESISTANT : Appropriate for roasts and cakes. The fan spreads the heat uniformly inside the oven.

TURN SPIT (GRILL + SPIT) : It s used for rotisserie such as roasted chicken etc.

TURN SPIT + (TOP RESISTANT + GRILL + SPIT) : It s used for rotisserie such as roasted chicken etc. It is ideal for larger portions.

LIGHT: All ovens have oven lamps but the oven lamp can be activated with an independent button in the models bearing this symbol.

ECO (FAN + RING HEATER) : More energy saving function for one or more levels cooking and frying. Ring heater and turbo fan are activated.

STEAM CLEAN: The heat turns water into steam and softens food residuals for easy cleaning.

PYROLYTIC CLEAN: It heats the inside of your oven to temperatures upwards of 480°C, turns food residual to ash.

KEEP WARM : Used for keeping food warm at a temperature ready for serving for a long period of time.

GRILL + BOTTOM RESISTANT : Special for roasts. It can be used for any piece, whatever its size.

TOP FIRE + BOTTOM FIRE (GAS FURNACE) : Top and bottom elements are activated.

TOP FIRE (GAS FURNACE) : Top element is activated.

BOTTOM FIRE (GAS FURNACE) : Bottom element is activated.

IGNITION (GAS FURNACE) : Automatic ignition for gas area.

HOBS

Very step on the path to culinary art forms a part of a whole. Strong designs, advanced technology, multi-functionality.

GAS HOB

Combustion of gas is used as the source of heat.

GAS PROOF SAFETY

It cuts off the gas supply immediately to ensure full safety.

VITROCERAMIC HOB

Intensive heat - resistant and shockproof ceramic glass surface (Resistant up to 850°C)

BRIDGE

Two separate cooking zones can be used as a single and large surface.

INDUCTION HOB

It is the high-frequency electromagnetic feature which transforms the container into a heat generator rather than conveying the heat it generated to the container

AFTER HEAT INDICATOR

The post-heating indicator shows whether it is safe to touch the surface.

EASY CLEANING

Easy cleaning for day to day maintenance.

TIME ASSISTANCE

The function of the closure of timer closes all of hotplates safety when selected time expired.

WIDTH 60 cm

60cm

The width of the oven.

CHILD SCREEN LOCK

The child safety lock inhibits all functions of the hob with a single button.

FIRING IGNITION

Automatic ignition system.

BOOSTER

This function is used to heat the oven rapidly; it is not suitable for cooking food.

FIRE CONTROL

Gives you precise, convenient fire control over all cooking zones.

INDUCTION **HOBS**

HOODS

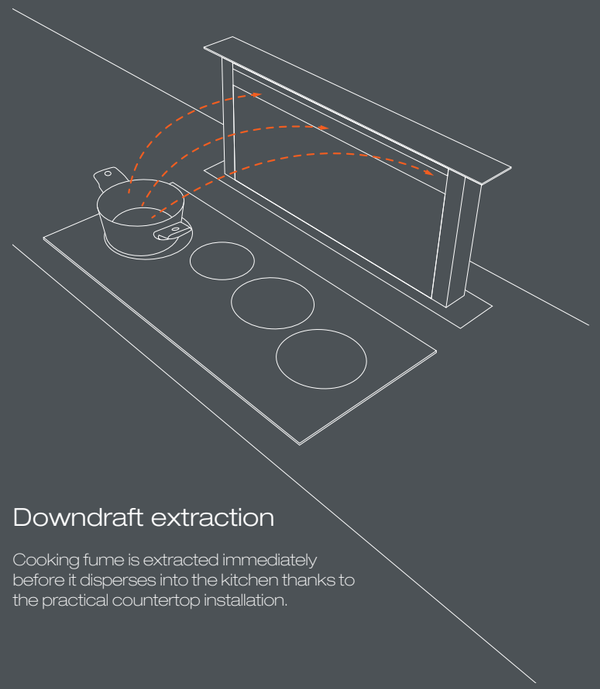
High performance is achieved through smart technologies and strong design. As we spend a great deal of our time there, who doesn’t want a clean and aesthetic kitchen?

we manage extraction in many ways

Silverline hoods provide you with a fume-free and fresh kitchen thanks to their unique design and different extraction systems for all types of kitchens.

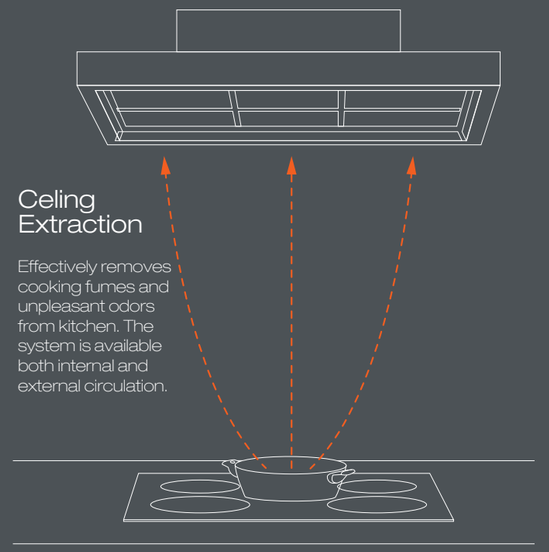
SILENCE

You can cook in peace in your kitchen with the noise level reduced down to 34 dB thanks to this feature.



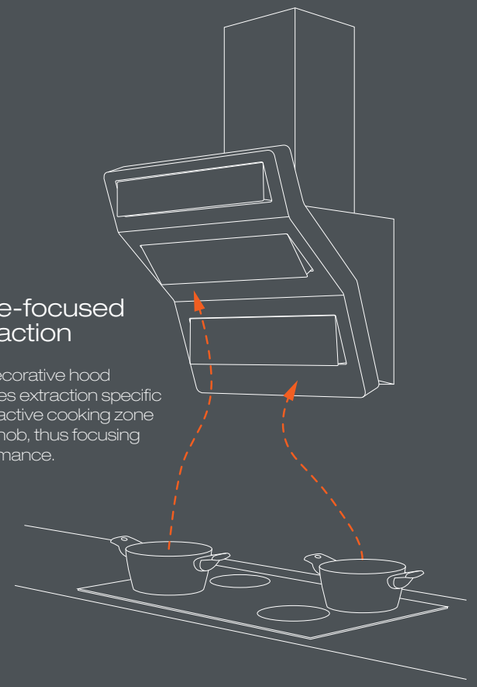
Downdraft extraction

Cooking fume is extracted immediately before it disperses into the kitchen thanks to the practical countertop installation.



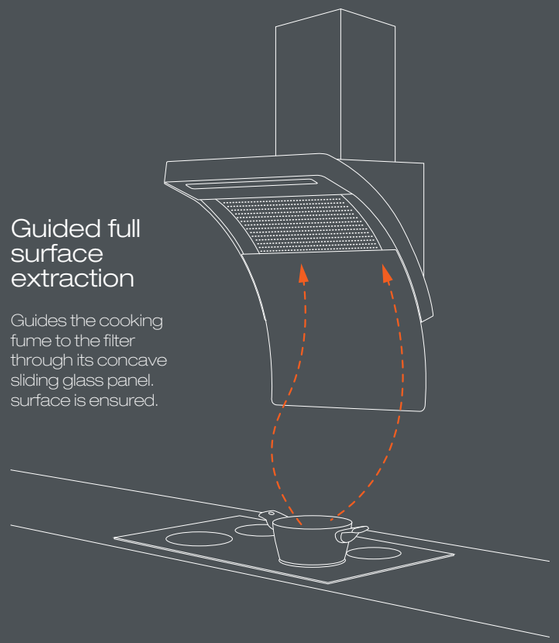
Celing Extraction

Effectively removes cooking fumes and unpleasant odors from kitchen. The system is available both internal and external circulation.



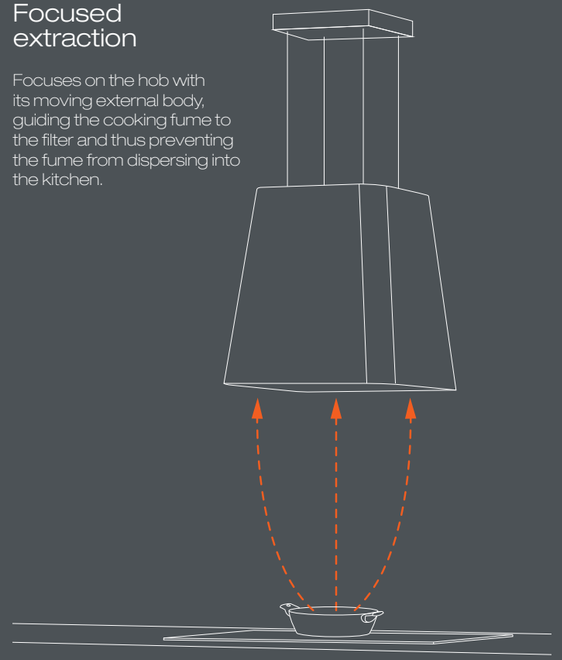
Zone-focused extraction

The decorative hood provides extraction specific to the active cooking zone of the hob, thus focusing performance.



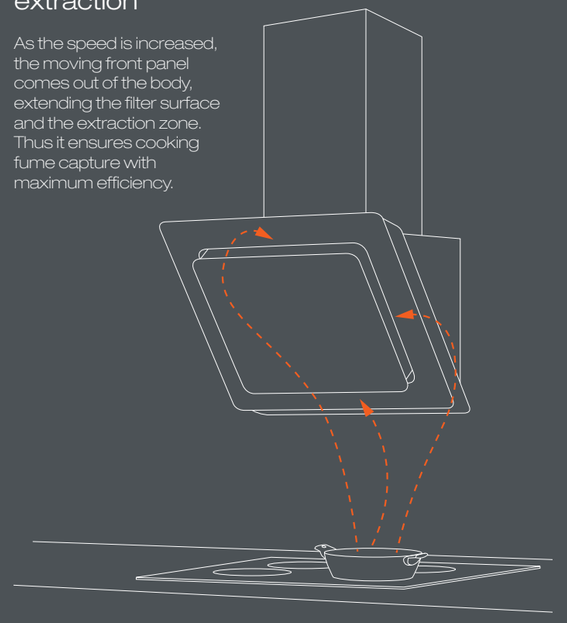
Guided full surface extraction

Guides the cooking fume to the filter through its concave sliding glass panel. surface is ensured.



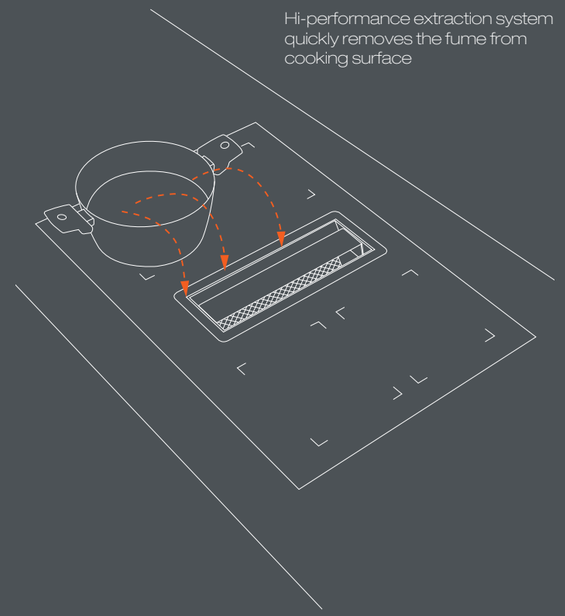
Focused extraction

Focuses on the hob with its moving external body, guiding the cooking fume to the filter and thus preventing the fume from dispersing into the kitchen.



Extendable split extraction

As the speed is increased, the moving front panel comes out of the body, extending the filter surface and the extraction zone. Thus it ensures cooking fume capture with maximum efficiency.



Integrated extraction

Hi-performance extraction system quickly removes the fume from cooking surface

ENERGY CLASS

A+++ | A++ | A+ | A | B | C | D

45cm

HOB DISTANCE (ELECTRIC)

The distance between electric hob and hood.

65cm

HOB DISTANCE (GAS)

The distance between gas hob and hood.

CARBON FILTER

It makes sure your kitchen is kept odour-free. The filter filtrates vapours and grease created by cooking.

REMOTE CONTROL

Control with a functional remote controller.

APP CONTROL

Control with IOS and/or Android applications.

SILVER CONNECT

Automatic adjustment of the hood speed according to the air flow by the cooker with Bluetooth.

EASY INSTALLATION

Easy installation of hoods via spending less time and energy

75 kg

WEIGHT

The weight of hood.

LIGHTING (STANDARD)

The halogen lamp has high efficiency, quality of light, and high rated life.

LED LIGHTING

Provides higher brightness with lower energy.

LED STRIPE LIGHTING

Provides flexibility and color options which make it perfectly suited for many lighting applications.

RGB LED LIGHTING

The color of the light is adjusted with the remote control.

TUNABLE LED LIGHTING

Temperature value of white color.

AUTOMATIC SENSORS

Automatic control for the functions.

CUSTOMISATION

Provides panel options according to the customer's preference.

HI SERIES

Guarantees brilliant cooking experience and fresh air by Hi technologies.

WORKTOP **HOODS**

The integrated hood in hob extracts unpleasant odors and steam emitted during cooking directly from the source. This ensures continued clean air flow in the kitchen.

Alexa

Pop Out Hi allows you to control the cooker and hood over the touch screen, as well as the voice command feature.

Precise Sensors

You can measures the humidity, heat and quality of air in the environment and manage them online.

Pop Out Hi is able to understand and consider the quality of interior to activate the system if it is necessary.

Media

With its camera, you can shoot photo, share your cook via social media, also you are able to connect to the product to see the environment when you are away.

Chef

With telephone and tablet aplications, you can che-ck and cook for ready made recipes.

Monitoring

Thanks to the IoS & Android based application, you can control all data of the hood with one control unit.

POP OUT hi+

Silverline Hi Series guarantee brilliant cooking experience and fresh air by simply activating and controlling hob and hood. Also the series offer the opportunity to control air quality in the domestic environment, even while away from your home.

the extendable colored filter gradually pops out as the speed is increased and expands the extraction zone, thus ensuring cooking fume capture with maximum efficiency.

illuminates the whole cooking area thanks to the ergonomic lighting.

REFRIGERATORS

With their advanced functions, Silverline refrigerators keep your food as fresh as the day they were stored.

LARGE CAPACITY

Provides spacious storage area thanks to large inner volume.

NO FROST

The no-frost system isolates the freezer from humidity, ensuring that the air inside the fridge remains dry. Thus it prevents humidity and frosting on the inner walls of the product to ensure that food does not freeze. Thanks to this system, food items are frozen more quickly, more evenly and balanced matter, remaining as fresh as the first day.

EXTRA COLD SECTION

Designed specifically for dairy/breakfast items, the "Chiller Compartment" keeps food between - 2°C and + 3°C. This compartment is ideal for storing breakfast items and etc..

ELECTRONIC CONTROL

The "Electronic Control" panel allows the user to set separate temperatures for the fridge and the freezer.

VACATION MODE

This function allows you to operate your refrigerator at low power when you are going to be away from home for a long time. When this function is selected, food in the freezer is kept as they are. To prevent bad odours in the freezer, the temperature is kept at around 12 degrees all the time. Moreover, you also save energy since the compressor does not run continuously in this mode.

ARTIFICIAL INTELLIGENCE

Thanks to the "Artificial Intelligence" function, the refrigerator detects the environmental temperature to set its own refrigerator, saving you the trouble of manual setting.

TOUCH CONTROL

Along with a modern appearance, the "Touch Control" offers ease of use in terms of technologic aspects to allow the user to set separate temperatures for each compartment.

MOISTURE CONTROL (VEGETABLE)

Without the humidity control function, the air inside the crisper evaporates, reaching the food and shortening its life.
Thanks to the adjustable "Humidity-Controlled Crisper" function in your refrigerator, the air inside the crisper condenses to allow you to keep humidity ratios of the food under control. This way, food items are kept fresh for a longer time.

BLUE LIGHT

Equipped with sterilisation function, the "Blue Light" lighting function illuminates fruits and vegetables with a light that has the ideal wavelength, ensuring that they photosynthesise as they do in the nature. Food whose tastes and aromas are preserved remain fresh for a longer time and preserve the vitamin C they contain.

ICE MAKER

"Rotary Ice Maker" makes ice in about 2-3 hours. Ice pieces in the container fall into the ice storage container below once the knob on it is turned. The ice storage container is only intended to store ice.

LED LIGHTING

It provides a more powerful white light for the interior of the refrigerator.

ANTI-FINGER PRINT

This feature ensures that the outer surface of the refrigerator looks clean at all times.

HIGH PERFORMANCE REFRIGERATION TECHNOLOGIES

An indispensable element of any kitchen with a unique design and essential functionality. SILVERLINE Refrigerators are equipped with significant technical features such as the Anti-Odor and Air Cleaning System with UV, LED and Platinum Rays, the Anti-bacterial System preventing bacterial growth and propagation, the Vitamin-C Fresh System ensuring moisture control that will allow fruit and vegetables to maintain their nutritional value for longer, and the Multiple Air Flow System that increases the efficiency of your refrigerator. The energy class refrigeration technology offers high performance with minimal operating noise. In addition to providing your kitchen with a contemporary look thanks to their elegant aesthetic and inox steel finish, they also maintain a clean appearance cleanliness thanks to their fingerprint-resistant surface. The changeable opening direction of the doors provides for flexible installation that can be adapted kitchens of all styles.

- Door Diameter : 330 mm
- Door Outer Frame Diameter (outer) : 480 mm
- Loading Quantities (20ft/40ft/40HC) : 48/102/153
- Net Dimensions (WxDxH) : 595 x 565 x 850
- Gross Dimensions (WxDxH) : 680 x 695 x 875

WASHING MACHINE

A+++ | 9 Kg | 16 Program

WM14007X01

Washing Machine

- Energy Efficiency Class : A+++ -10%
- Colour : Inox
- Net Weight : 71 Kg
- Gross Weight : 76 Kg
- Rated Power Supply : 220-240 V
- Rated Frequency : 50 Hz
- Rated Washing Capacity : 9 Kg
- Rated Spinning Capacity : 9 Kg
- Rated Power : 2000 W
- Rated Current : 10 A
- Power consumption left-on mode : 1 W
- Power consumption off-mode : 0,5 W
- Max. Spin Speed : 1400 RPM
- Standard Water Pressure : 0.05~1 Mpa
- Display Type : LED
- Display Colour : Orange
- Door Lock : PTC Lock
- Motor : AC Motor
- Plug type : Euro Plug
- Power cord length : 1,5 M
- Water Inlet Hose Length : 1 M
- Water Outlet Hose Length : 1,6 M
- Moisture Ratio : 53%
- Number Of Program : 16
- Volume Of Inner Tub : 56,2 L
- Diameter Of Inner Tub : 472 mm
- Port hole : 310 mm
- Door Outer Frame Diameter (outer) : 480 mm
- Loading Quantities (20ft/40ft/40HC) : 48/108/159
- Net Dimensions (W×D×H) : 595 × 565 × 850
- Gross Dimensions (W×D×H) : 680 × 660 × 875
