new generation kitchen experience

The dynamics of the age we are living in are our guide. Demand, likes, trends. Our corporate culture is based on the know-how and experience we have accumulated throughout our history. All these values constitute the commitment we represent. Contemporary, far-from-obsolete, innovative products employing the latest technologies and improving quality of life.

our design approach

The kitchens in our living spaces have had different meanings throughout ages. Today, the kitchen is more than just a cooking area in our homes. New urban lifestyles, such as high technology, common area use and high efficiency, have changed the characteristics of kitchens, making them more integrated into our daily lives. Therefore, Silverline offers an approach that focuses on the changes in the meaning and characteristics of the kitchen while creating new design solutions.

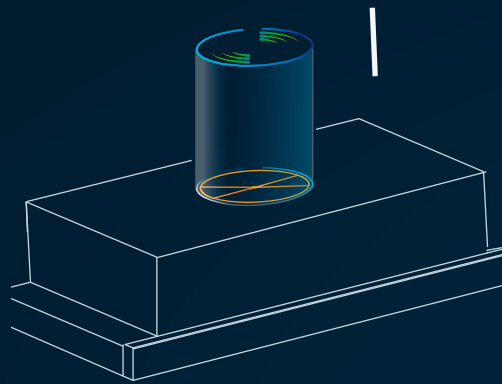

Based on sectoral trends in our designs in the cooking appliances line, we looked for new ways that are meaningful and fascinating for the end user, that emphasize the strong stance of the brand in the built-in appliances industry, that are user-centered and are simplified for the user.

HOODS

High performance is achieved through smart technologies and strong design. As we spend a great deal of our time there, who doesn't want a clean and aesthetic kitchen?

Maximum technology and energy efficiency!

Developed by Silverline R&D Center, the SilverCVS (Central Ventilation System) technology is integrated into the central airflow stations of the building to optimise energy efficiency.

Having the ability clean the ambient air without running the hood motor, this system comes to the fore with a low noise level (26 dB) and the self-cleaning function.

It offers high performance with low energy consumption.

It is quick and easy to apply.

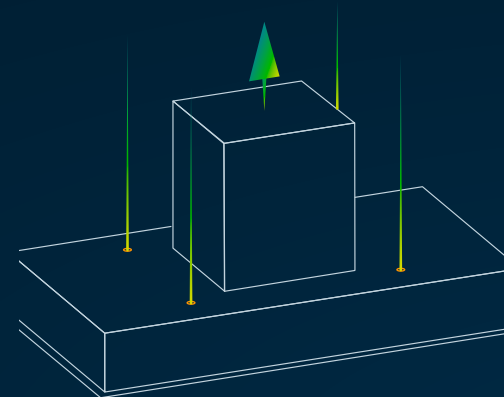

Adjustment is made through pressure measurement on Silver Central Ventilation.

Clearances on the disc are adjusted to ensure the desired amount of air flows in the most efficient way.

It runs in the optimum way thanks to the precise flow adjustment.

Easy installation

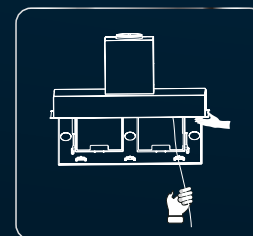

SiverWire, the steel hanging system that permits easy installation of hoods, offers ease of installation and saves you time.

The hood is easily positioned with the help of 4 steel wires and can be installed by one person only.

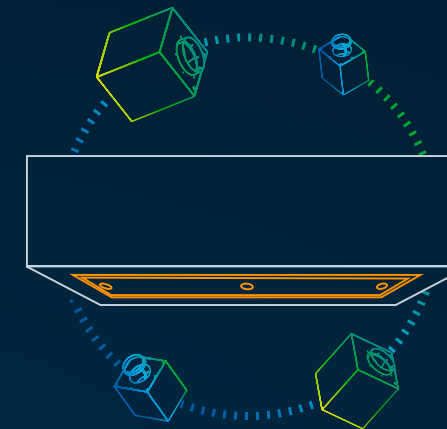

The steel wire system allows durable and convenient installation.

It is installed by one person without spending too much time.

The silence that your kitchen needs..

Allowing the hood motor to be moved outside in a modular way, the SilverFlex technology offers the user a convenient kitchen experience

Ensuring that the ventilation motor, the primary source of noise of hoods can be installed outside, this special technology is the beginning of a new silent era in the kitchen.

SilverFlex allows you to install the hood motor in an exterior place.

There is no noise in the kitchen while the hood is running.

You get to experience high performance together with a silent hood.

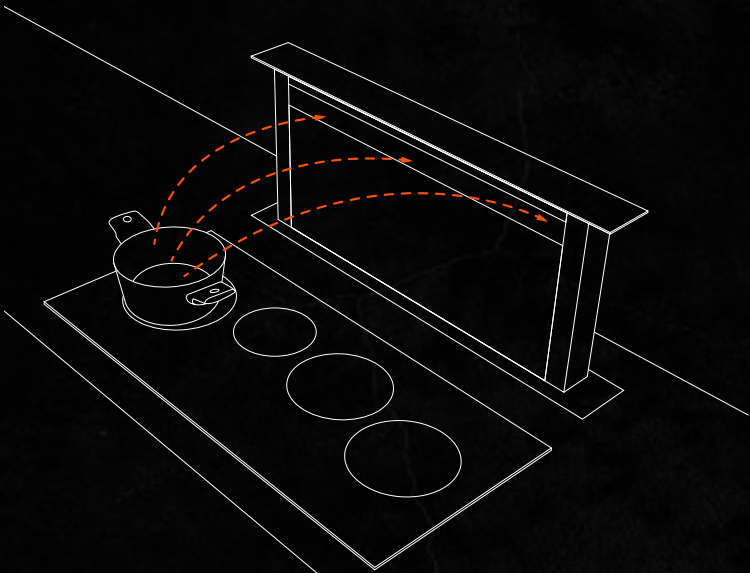

we manage extraction in many ways

Silverline hoods provide you with a fume-free and fresh kitchen thanks to their unique design and different extraction systems for all types of kitchens.

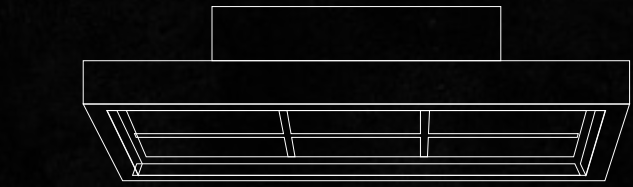

You can cook in peace in your kitchen with the noise level reduced down to 34 dB thanks to this feature.

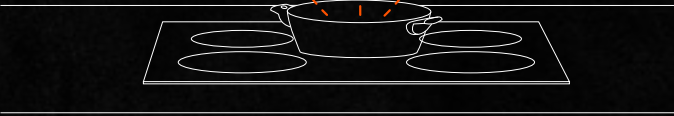

Downdraft extraction

Cooking fume is extracted immediately before it disperses into the kitchen thanks to the practical countertop installation.

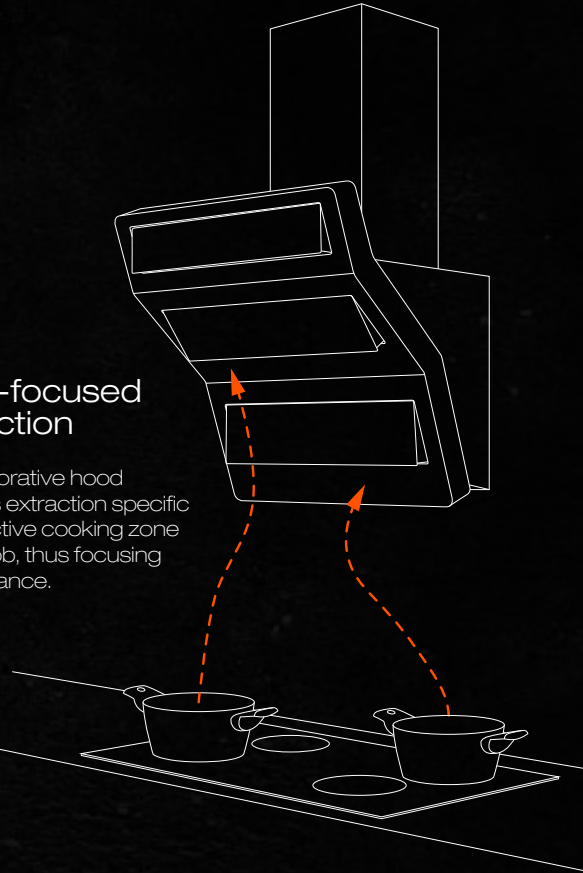

Celing Extraction

Effectively removes cooking fumes and unpleasant odors from kitchen. The system is available both internal and external circulation.

Zone-focused extraction

The decorative hood provides extraction specific to the active cooking zone of the hob, thus focusing performance.

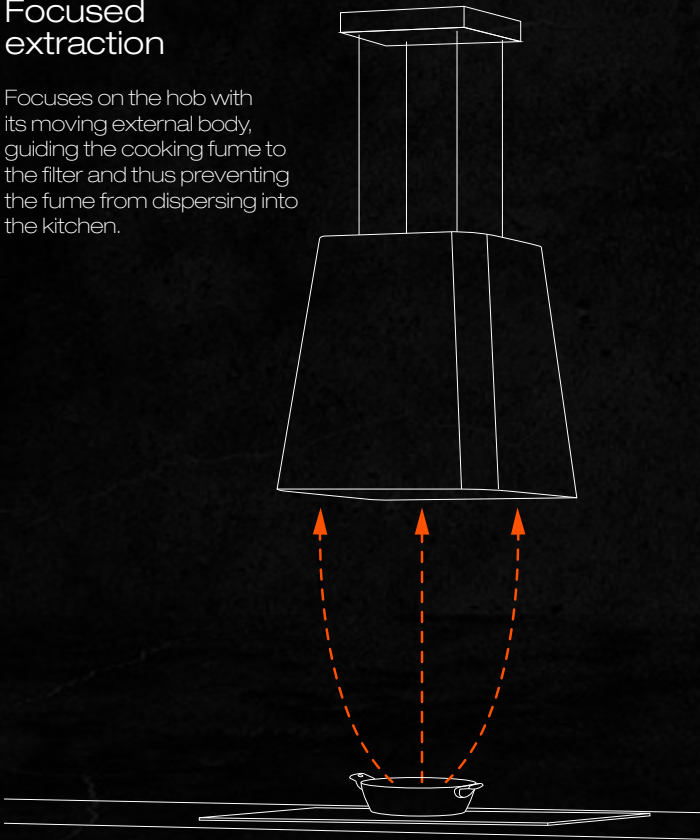

Guided full surface extraction

Guides the cooking fume to the filter through its concave sliding glass panel. surface is ensured.

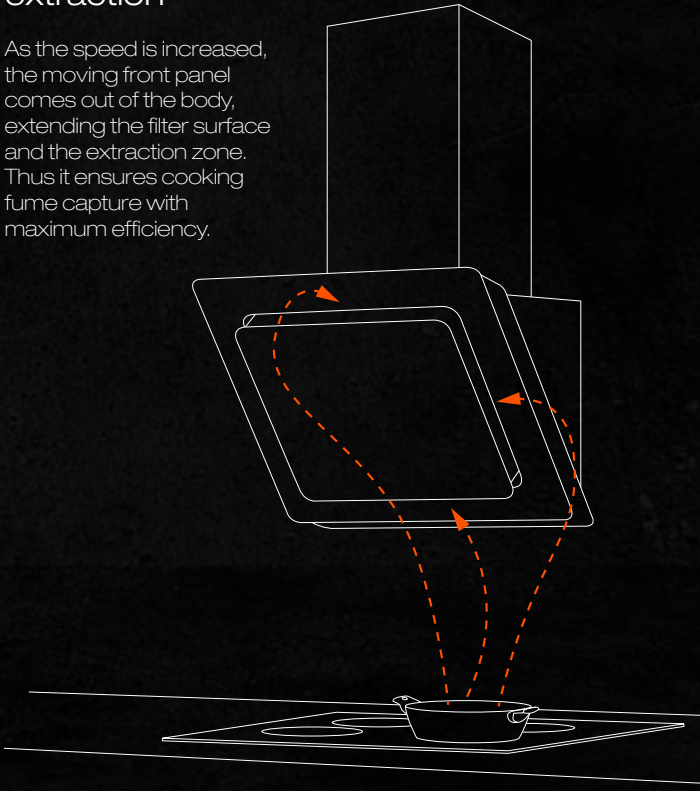

Focused extraction

Focuses on the hob with its moving external body, guiding the cooking fume to the filter and thus preventing the fume from dispersing into the kitchen.

Extendable split extraction

As the speed is increased, the moving front panel comes out of the body, extending the filter surface and the extraction zone. Thus it ensures cooking fume capture with maximum efficiency.

Integrated extraction

Hi-performance extraction system quickly removes the fume from cooking surface

ENERGY CLASS

HOB DISTANCE (ELECTRIC)
The distance between electric hob and hood.

WEIGHT
The weight of hood.

HOB DISTANCE (GAS)
The distance between gas hob and hood.

LIGHTING (STANDARD)
The halogen lamp has high efficiency, quality of light, and high rated life.

CARBON FILTER
It makes sure your kitchen is kept odour-free. The filter filtrates vapours and grease created by cooking.

LED LIGHTING
Provides higher brightness with lower energy.

REMOTE CONTROL
Control with a functional remote controller.

LED STRIPE LIGHTING
Provides flexibility and color options which make it perfectly suited for many lighting applications.

APP CONTROL
Control with IOS and/or Android applications.

RGB LED LIGHTING
The color of the light is adjusted with the remote control.

SILVER CONNECT
Automatic adjustment of the hood speed according to the air flow by the cooker with Bluetooth.

TUNABLE LED LIGHTING
Temperature value of white color.

EASY INSTALLATION
Easy installation of hoods via spending less time and energy

AUTOMATIC SENSORS
Automatic control for the functions.

CUSTOMISATION
Provides panel options according to the customer's preference.

HI SERIES
Guarantees brilliant cooking experience and fresh air by HI technologies.

V12 DYNAMIC IQ MOTOR
New generation engine technology with high energy efficiency, air extraction performance and very low noise level.

V12 AC MOTOR
????????????

PLUG & PLAY
Easy installation without pipe kit.

AIR QUALITY INDICATOR
Air quality feedback to keep ambient air quality at the best level and automatic function.

WASTE WATER CAPACITY
Maximum waste water capacity of the product.

SILVERMUTE
Products with a whisper-level sound.

USING WITH PIPE
Usage with pipe for worktop hoods.

AUTO MODE
Automatic hood system operating simultaneously with the hob for worktop hoods.

MANUAL MODE
Manual control of hood functions.

ACTIVE FLEX CARBON FILTER
Flexible carbon filter that allows easy usage and replacement.

FILTER LIFECYCLE INDICATOR
Alerts when filters are due for replacement.

FULL SURFACE LIGHTING
Creates a brighter kitchen environment.

LIFT
Adjustable height for the hood.

AUTO FUNCTION
It enables the product to work automatically thanks to the data it receives from the sensors.

STEAM SENSOR
It detects the steam and ensures that the hood works automatically.

WORKTOP HOODS

The integrated hood in hob extracts unpleasant odors and steam emitted during cooking directly from the source. This ensures continued clean air flow in the kitchen.

hi⁺ Series

EXPLORE THE WORLD

Silverline hi⁺ Series give more freedom and time to try new things and places.

CONTROL DEVICES WHEN YOU ARE AWAY

Silverline hi⁺ Series assure you everything is well in your kitchen.

MAKE YOUR LIFE EASIER

Silverline hi⁺ Series support you.

CONNECT WITH SMART THINGS

Silverline hi⁺ Series are task-ready!

TALK TO EACH OTHER

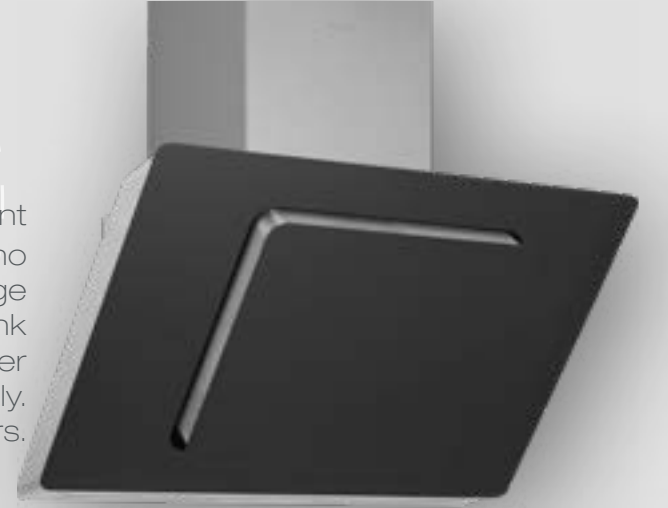

Silverline hi⁺ Series will inform you about your kitchen.

High Intelligence

As the heavy air and odors in the kitchen disperse, you want to control and improve the ambient air immediately. Nano sensors from the HI Series by Silverline detect the change in the ambient air without even leaving you the time to think about it, and switch on automatically to clean the air. After completing their duty, these sensors turn off automatically. This way, you will not have to worry about unpleasant odors.

Discover the new opportunities

With the HI SERIES that combines technology and design, Silverline offers a smart kitchen experience to turn kitchens into enjoyable living spaces.

Making kitchen experience easier

You don't have to think about coordination in your kitchen. Someone else is doing it for you: Smart products from Silverline's HI SERIES will make your work in the kitchen much easier. All you need to do is enjoy the convenient and smart kitchen experience. Discover Silverline's world of High Intelligence.

REMOTE CONTROLS

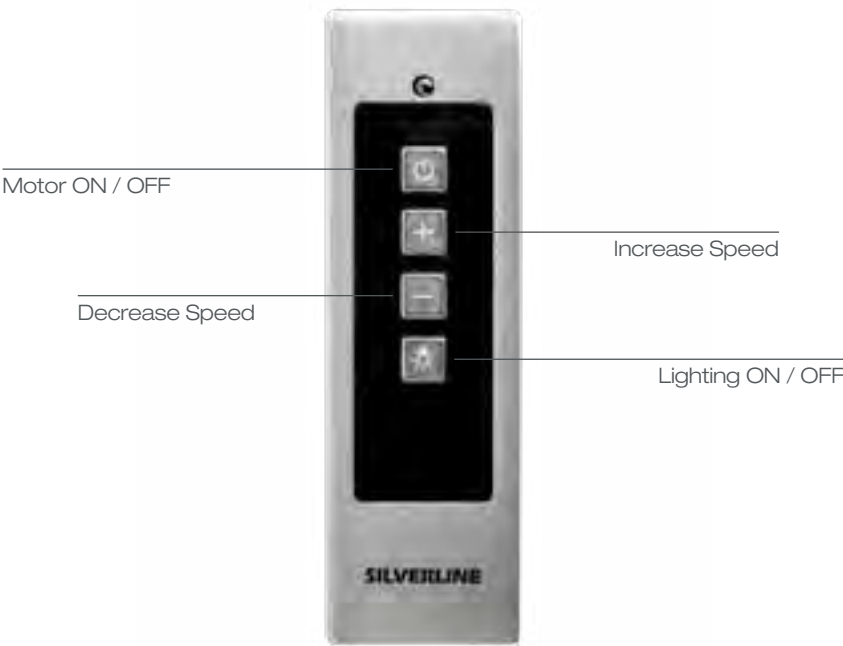

CURVED REMOTE CONTROL

- ERGONOMICS**
Curved design which fits ergonomics of hand perfectly.
- USER-FRIENDLY**
Control all of the hood features at a touch.

- RECHARGEABLE**
Lithium battery, rechargeable by the included micro USB cord.
- MAGNETIC**
Magnets placed inside the body allow it to be securely placed on any metal surface.

OVENS

The kind of multi-functionality that adds taste to your meals and makes expert cooks envious at the same time is now integrated with a multi-dimensional understanding of design.

MEAT PROBE

It gives very accurate cooking results by measuring the internal temperature of the food.

TELESCOPIC RAIL

Allows you to remove trays easily from the oven. This makes usage of trays more convenient and easy to use.

CHILD SCREEN LOCK

No matter what key your child plays on the screen, the settings of your oven can't be changed.

COOL DOOR

The reflective glass on the inside of the door significantly reduces the temperature of the outer part of the door at all ovens. So, it provides a safer environment when preparing the delicious meals in the oven.

3D AIR FLOW

It provides proper heat distribution for uniform cooking and convenient for cooking up to 3 trays.

LARGE CAVITY SIZE

It gives flexibility to prepare larger meals with its 72 liter net volume.

SELF-CLEAN +

The quick and easy option for effortless cleaning thanks to catalytic panels. The back and side wall panels absorb dirt that splashes from food.

SELF-CLEAN

Above advantage is available only for back wall.

EASY CLEANING

The easy cleaning for day to day maintenance.

ANTI - FINGER INOX

Anti-finger inox surface provides comfort in cleaning.

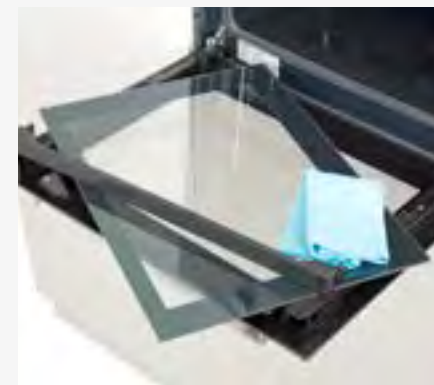

SOFT CLOSE

It slows down the movement of the door and ensures your oven door closes gently.

SOFT OPEN CLOSE

It slows down the movement of the door and ensures your oven door opens and closes gently.

EASY EXTRACT

It enables to remove easily the front glass panels of the oven.

STEAM CLEAN

The heat turns water into steam and softens food residuals for easy cleaning.

Easy Cleaning: It's time for a little magic!

Cleaning the oven can be an easy scrub free task with just a little bit of work. Silverline makes the cleaning of the ovens much easier by offering various cleaning solutions. They prolongs the life of your oven and help you save time every day to make your life easier in your kitchen.

LEGENDS

OVENS

- 

BOTTOM RESISTANT: To cook something which needs to crisp on the base but stay moist on the top. This function is best suited for foods which need more temperature at the base such as pastry and pizzas and it is great for gently cooking stews and casseroles.
- 

TOP RESISTANT: Top resistant creates the perfect roasting or crisping effect. Helps with the browning of dishes such as those topped with cheese or potatoes, under a less fiery heat than grill.
- 

TOP RESISTANT + BOTTOM RESISTANT: Cooks items which sit in the centre of the oven best. Use this conventional heating mode for roasting meat and vegetables or baking cakes.
- 

TOP RESISTANT + BOTTOM RESISTANT+ FAN: Food is cooked evenly and quickly all around thanks to lower and upper resistants and the fan are simultaneously on. This mode is most suitable for delicate cooking such as cakes, pastries, biscuits.
- 

TOP RESISTANT + GRILL: Food can be cooked extremely quickly using both the top resistant and the grill.
- 

TOP RESISTANT + GRILL + FAN : Top resistant, grill and fan are activated simultaneously, so heat is spread throughout the oven and radiated over the grill's surface area. It is ideal for larger portions.
- 

3D TOP RESISTANT + FAN + RING HEATER + BOTTOM RESISTANT : Top and bottom resistants, turbo fan and ring heater(located around the turbo fan) are activated simultaneously. It provides proper heat distribution for uniform cooking and convenient for cooking up to 3 trays.
- 

RING HEATER + FAN : It is used for one or more levels cooking and frying. Ring heater and turbo fan are activated.
- 

DEFROST : It ensures that the food defrosts in a couple of minutes without losing its nutritional value.
- 

BOOSTER: The booster function is used for quick pre-heating to reach the desired cooking temperature. (It is not suitable for cooking food.)
- 

GRILL: Grill resistant is used especially for food to be fried.
- 

FAN + BOTTOM RESISTANT : For preparing pizza and dishes which require a lot of heat from underneath. The bottom heating element and the fan are activated.
- 

GRILL + FAN: This indicates the simultaneous activation of the grill and the turbo fan and enables the cooking of small portions of white and red meat, sausage, etc.
- 

GRILL + FAN + BOTTOM RESISTANT : Appropriate for roasts and cakes. The fan spreads the heat uniformly inside the oven.
- 

TURN SPIT (GRILL + SPIT) : It s used for rotisserie such as roasted chicken etc.
- 

TURN SPIT + (TOP RESISTANT + GRILL + SPIT) : It s used for rotisserie such as roasted chicken etc. It is ideal for larger portions.
- 

LIGHT: All ovens have oven lamps but the oven lamp can be activated with an independent button in the models bearing this symbol.
- 

ECO (FAN + RING HEATER) : More energy saving function for one or more levels cooking and frying. Ring heater and turbo fan are activated.
- 

STEAM CLEAN: The heat turns water into steam and softens food residuals for easy cleaning.
- 

PYROLYTIC CLEAN:It heats the inside of your oven to temperatures upwards of 480°C, turns food residual to ash.
- 

KEEP WARM : Used for keeping food warm at a temperature ready for serving for a long period of time.
- 

GRILL + BOTTOM RESISTANT : Special for roasts. It can be used for any piece, whatever its size.
- 

TOP FIRE + BOTTOM FIRE (GAS FURNACE) : Top and bottom elements are activated.
- 

TOP FIRE (GAS FURNACE) : Top element is activated.
- 

BOTTOM FIRE (GAS FURNACE) : Bottom element is activated.
- 

IGNITION (GAS FURNACE) : Automatic ignition for gas area.

HOBS

Very step on the path to culinary art forms a part of a whole. Strong designs, advanced technology, multi-functionality.

GAS HOB

Combustion of gas is used as the source of heat.

SMART CONNECT

It is possible to control the various functions of the hood directly from the hob.

VITROCERAMIC HOB

Intensive heat - resistant and shockproof ceramic glass surface (Resistant up to 850°C)

GAS PROOF SAFETY

It cuts off the gas supply immediately to ensure full safety.

INDUCTION HOB

It is the high-frequency electromagnetic feature which transforms the container into a heat generator rather than conveying the heat it generated to the container

BRIDGE

Two separate cooking zones can be used as a single and large surface.

EASY CLEANING

Easy cleaning for day to day maintenance.

AFTER HEAT INDICATOR

The post-heating indicator shows whether it is safe to touch the surface.

WIDTH

The width of the oven. (30-90 cm)

TIME ASSISTANCE

The function of the closure of timer closes all of hotplates safety when selected time expired.

FIRING IGNITION

Automatic ignition system.

CHILD SCREEN LOCK

The child safety lock inhibits all functions of the hob with a single button.

FIRE CONTROL

Gives you precise, convenient fire control over all cooking zones.

BOOSTER

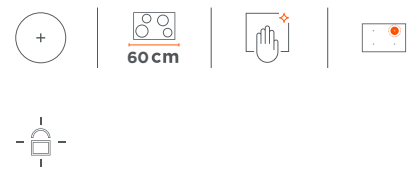

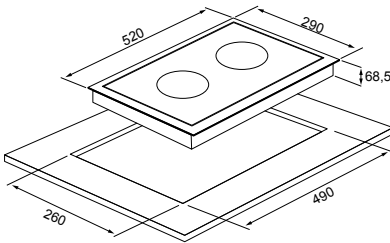

This function is used to heat the oven rapidly; it is not suitable for cooking food.

WOK burners give intense fire and with its two rings, it spreads the heat from the inside to the outside. Thanks to this, it preserve the nutritional elements while cooking the foods.

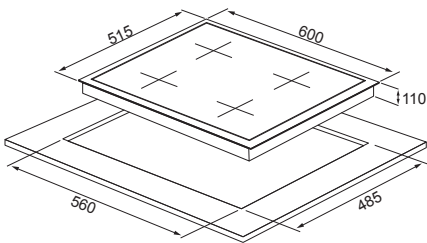

Saves time and energy while cooking with up to 9 level heat setting.

REFRIGERATORS

With their advanced functions, Silverline refrigerators keep your food as fresh as the day they were stored.

LARGE CAPACITY

Provides spacious storage area thanks to large inner volume.

ELECTRONIC CONTROL

The "Electronic Control" panel allows the user to set separate temperatures for the fridge and the freezer.

VACATION MODE

This function allows you to operate your refrigerator at low power when you are going to be away from home for a long time. When this function is selected, food in the freezer is kept as they are. To prevent bad odours in the freezer, the temperature is kept at around 12 degrees all the time. Moreover, you also save energy since the compressor does not run continuously in this mode.

ANTI-FINGER PRINT

This feature ensures that the outer surface of the refrigerator looks clean at all times.

EXTRA COLD SECTION

Designed specifically for dairy/ breakfast items, the "Chiller Compartment" keeps food between - 2°C and + 3°C. This compartment is ideal for storing breakfast items and etc..

ARTIFICIAL INTELLIGENCE

Thanks to the "Artificial Intelligence" function, the refrigerator detects the environmental temperature to set its own refrigerator, saving you the trouble of manual setting.

MOISTURE CONTROL (VEGETABLE)

Without the humidity control function, the air inside the crisper evaporates, reaching the food and shortening its life. Thanks to the adjustable "Humidity-Controlled Crisper" function in your refrigerator, the air inside the crisper condenses to allow you to keep humidity ratios of the food under control. This way, food items are kept fresh for a longer time.

ICE MAKER

"Rotary Ice Maker" makes ice in about 2-3 hours. Ice pieces in the container fall into the ice storage container below once the knob on it is turned. The ice storage container is only intended to store ice.

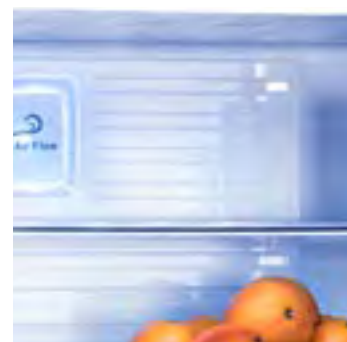

NO FROST

The no-frost system isolates the freezer from humidity, ensuring that the air inside the fridge remains dry. Thus it prevents humidity and frosting on the inner walls of the product to ensure that food does not freeze. Thanks to this system, food items are frozen more quickly, more evenly and balanced matter, remaining as fresh as the first day.

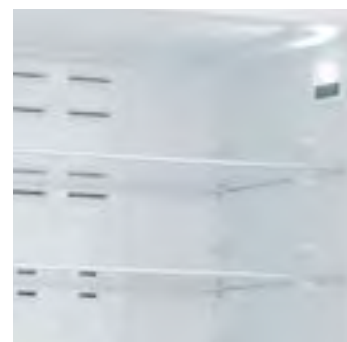

BLUE LIGHT

Equipped with sterilisation function, the "Blue Light" lighting function illuminates fruits and vegetables with a light that has the ideal wavelength, ensuring that they photosynthesise as they do in the nature. Food whose tastes and aromas are preserved remain fresh for a longer time and preserve the vitamin C they contain.

TOUCH CONTROL

Along with a modern appearance, the "Touch Control" offers ease of use in terms of technologic aspects to allow the user to set separate temperatures for each compartment.

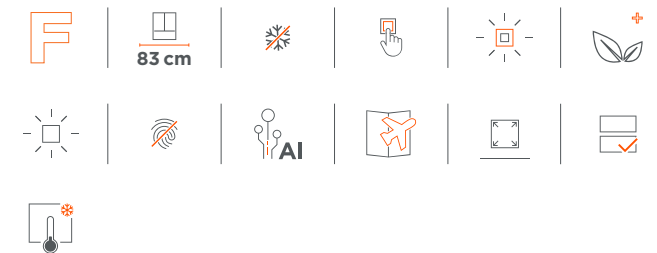

LED LIGHTING

It provides a more powerful white light for the interior of the refrigerator.

HIGH PERFORMANCE
REFRIGERATION
TECHNOLOGIES

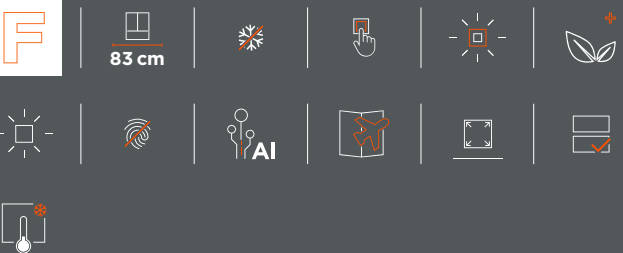

An indispensable element of any kitchen with a unique design and essential functionality. SILVERLINE Refrigerators are equipped with significant technical features such as the Anti-Odor and Air Cleaning System with UV, LED and Platinum Rays, the Anti-bacterial System preventing bacterial growth and propagation, the Vitamin-C Fresh System ensuring moisture control that will allow fruit and vegetables to maintain their nutritional value for longer, and the Multiple Air Flow System that increases the efficiency of your refrigerator. The energy class refrigeration technology offers high performance with minimal operating noise. In addition to providing your kitchen with a contemporary look thanks to their elegant aesthetic and inox steel finish, they also maintain a clean appearance cleanliness thanks to their fingerprint-resistant surface. The changeable opening direction of the doors provides for flexible installation that can be adapted kitchens of all styles.
